After a few hours of sunshine across the southern coal fields of West Virginia, temperatures climbed into the mid 70s with surface dew points in the upper 50s. Thunderstorms developed over Kentucky and Tennessee during the afternoon. These storms then raced northeast, into southern West Virginia during the evening.

KANAWHA (WV-Z015)

A gust to 28 mph may have contributed to a construction site accident at Yeager Airport, that resulted in one fatality. A worker was on a scissor lift and riveting bolts into the steel beams of a common-use hangar at the general aviation area. Part of the new structure collapsed and the steel beams fell. The 46 year old man was killed. OSHA was investigating the accident.
